

Stainless Steel Options

**A Wet Location label does not prevent corrosion from occurring.
Selecting the correct stainless steel construction is critical.**

S3 option (Stainless steel exterior) Construction is: Stainless steel end caps, hubs, rings, and plugs. For interior/exterior applications not in direct contact with the element.

S4 option (Stainless steel complete) Construction is: Stainless steel end caps, hubs, rings, and interior. Fully exposed interior/exterior applications where weep holes would be needed.

Stainless steel options come in Type 304 stainless steel and can be upgraded to Type 316 for harsh environments.
