

DEPENDABLE LIGHTING FOR LASTING HIGH PERFORMANCE!

Industrial and Commercial lighting is our specialty! Paramount has the the right luminaire for your application. Every luminaire features high product integrity plus the advantages of our experience and time proven design.

Built-in Ruggedness

Start with heavy gauge zinc-coated or stainless steel for maximum corrosion protection. Add quality craftsmanship: welding, painting, sealing (on wet location listed models) and assembly. We use energy-efficient LED's and our products are manufactured and built in the USA.

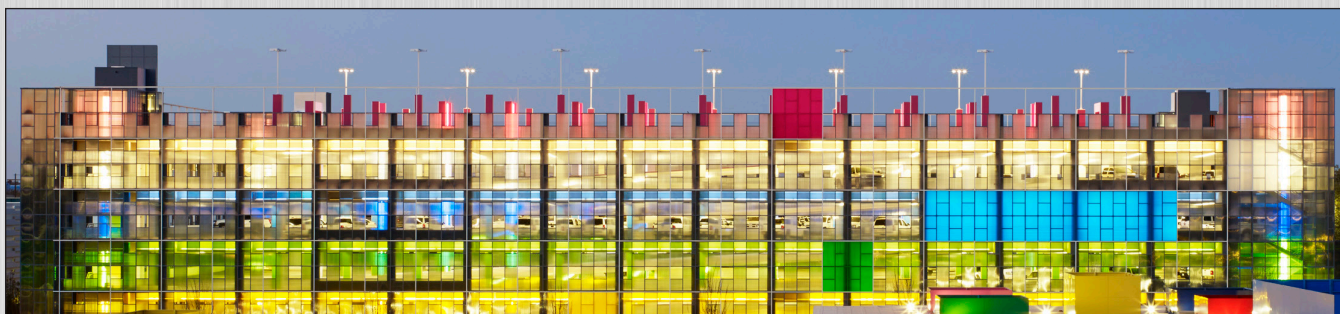

Paramount began designing and building industrial luminaires in 1949, with our first Craft Lite® enclosed and gasketed unit. We built some of the first assembly line floor and pit lights for the automotive industry. Our products have changed with the needs of industry, but our commitment to quality is as durable as our luminaires.

Applications

Paramount's high performance lighting is designed to excel in your most demanding situations. You'll find our quality industrial and commercial products in:

- Automotive Assembly
- Manufacturing Facilities
- Distribution and Warehouses
- Refrigerated Storage
